RBM5

**ADDITIV
GELADUR**

**B&W PHOTO CHEMISTRY
IT'S MAGIC**

ROLLEI BLACK MAGIC 5

This special hardener will be added to the developer solution. It serves as adhesion improvement and increases the mechanical resistance of the emulsion. Liquid photo emulsions are basically unhardened and must be hardened especially with the RBM5.

250 ml Concentrate

**ROLLEI BLACK MAGIC 5
#RBM52**

**LP-GELADUR
#LPE520**

LOT No. 61803

**Supplement for Developer!
Do not use for fixing baths!**

Caution: RBM5 is a liquid concentrate. It serves to produce for a hardening developer. The concentrated solution has an pH-value of 3. Therefore it acts as an strong acid, which must be handled very carefully.

Please avoid contact with other photographic concentrates.

Processing under careful procedure in the following succession:

1. Developer concentrate	150-175 ml
2. Water	775 ml
3. RBM5	75-50 ml
= Custom solution	1.000 ml

Attention: In combination with a hardening developer, an influence of the emulsion color in the direction of „warm“ may be possible. RBM5 is to be used for liquid emulsions, glossy FB papers, and film materials.
